

FRAMEWORK COMPLIANCE ASSESSMENTS

Overview

Regulatory entities require that organizations adhere to certain guidelines and frameworks because attackers are always on the prowl looking for the weak link that will let them in. In addition, many organizations that are not regulated may have chosen to follow a framework, but don't know how well they adhere to that framework.

The Challenge

How does an organization determine if they are complying with the framework they choose to follow or are required to follow? Most just go with having internal staff making that determination and end up suffering the consequences of a bad audit, or even worse, a cyber incident or breach. Some entities struggle with using the same assessment provider for several years and are not getting real and fresh results. How do you really know that you are in compliance with your own company's policies and controls?

Why InfoSight®?

24x7x365 Staffed SOC

100% US based SOC 2 Certified **Operations Center**

Only US-based W2 employees

Providing both Security and Network Infrastructure Support

Support for Cloud, Datacenter or Hybrid networks

Monitoring of Applications, DBs, Security, Infrastructure, Server or Serverless

Offering Device-based or consumption-based pricing models

24x7 or off-peak 7pm-7am coverage available

Federally regulated and critical infrastructure client experience

Cyber liability insurance coverage

24+ years of successful outcomes

How We Solve It

InfoSight has trained staff with years of experience in assessing organizations against a myriad of regulatory requirements and frameworks, from GLBA and FFIEC requirements, to NIST CSF, PCI-DSS, and HIPAA, to name a few. Our experienced assessors will work with your team to gather evidentiary items to assess your compliance with your chosen framework, then provide you with real documentation and recommendations that can be used to enhance your compliance and cyber security posture.

The Outcome

We provide you with a detailed roadmap showing where you are and where you should be as it relates to compliance with your framework. In addition, we provide a detailed plan of actions and milestones for you to use on your journey to enhance your existing compliance. You will be able to show management, your Board, Shareholders, auditors, and anyone else you choose, that you are adhering to your framework thereby having an enhanced cybersecurity posture.
