

Security Exchange Bank Case Study Managing Compliance Risk

Security Exchange Bank entrusts InfoSight, Inc. for Information Security Services to Meet the Challenges of Managing Compliance Risk.

Security Exchange Bank (SEB) partners with InfoSight™, Inc. for their Managed Information Technology and Security Services and continues to receive favorable reviews from the regulators and independent auditors. The easy to read Information Security Reports provided by InfoSight enable SEB to demonstrate compliance with regulatory guidelines like GLBA and FFIEC, hereby making IT Regulatory Exams a painless and quick process. Security Exchange Bank has the confidence in their Information Security and their management of regulatory compliance because of their partnership with InfoSight. InfoSight provides the community bank with an on-going Security Policy review combined with Managed Security and Compliance reporting services.

Since the relationship between InfoSight and Security Exchange Bank began, the bank continues to maintain favorable compliance status. Three years ago, the Compliance Officer left the bank and the Vice President of Information Technology was asked to take over the bank's Compliance responsibilities. InfoSight was given the opportunity to provide SEB with an updated, compliant Security Policy and recommended services for the bank to help meet the bank's Information Security audit requirements.

According to Cindi Dybdal, Vice President of Information Technology at SEB, "InfoSight was asked on short notice to update a Security Policy and to assist the bank with the documentation requirements for an upcoming exam. The team at InfoSight remarkably exceeded expectations and provided the bank with a very detailed and comprehensive Security Policy and assisted the bank with everything needed to meet Compliance obligations."

InfoSight Managed Services' Compliance reports are very user-friendly and well documented for an examiner in a non-technical manner. "InfoSight has demonstrated continuously their breadth of knowledge on Information Security and I know they will provide new ways to assess and mitigate risk, as well as, leverage resources to improve exam performance," states Dybdal.

"We make a great team. InfoSight remotely manages our services, however I feel like they are located within our bank. The team is very responsive, and they make it affordable to get the services we need for our community bank," said Dybdal.

Security Exchange Bank has been in operation since April 2000. The community bank serves the residents of Cobb County; as well as, Douglas, Cherokee, Paulding and North Fulton counties. The community bank is locally owned and prides itself in providing the best customer service possible. InfoSight contributes to community banks successes by making the best Information Security solutions affordable for the community banking community.
