

InfoSight™, Inc. Celebrates 10-Year Anniversary

September 9, 2008, Miami Lakes, FL – InfoSight™, Inc. announces 10-year anniversary.

InfoSight, Inc. proudly celebrates 10 years of successfully designing and managing complex Information Technology (IT) infrastructures for financial institutions and other regulated companies nationwide. InfoSight has evolved into a highly experienced Information Technology company offering infrastructure and managed services to companies in need of information technology, security, and compliance consulting services.

“It has been an exciting adventure to achieve this level of success while protecting and implementing sophisticated infrastructures for our customers,” states Tom Garcia, CEO of InfoSight. “Our company was one of the first technology companies to implement managed security services for financial institutions. Today, we continue to develop and manage top-quality technology solutions while offering some of the most advanced compliance reporting in the industry,” Garcia continues.

The ever increasing compliance burden continues to be the driving force behind IT product development and compliance regulations continue to become more detailed for security requirements of organizations. For over ten years, InfoSight rises to the continuous challenge of providing IT solutions to ease the burden most institutions face with new technologies for advanced threats, upgrading existing systems, and implementing risk mitigation strategies to help clients achieve higher degrees of efficiency, security assurance, and regulatory compliance.

According to Gilda Kawano, AVP Compliance/Operations of Desjardins Bank, “We have been a customer of InfoSight for ten years and continue to benefit from their services. InfoSight is very reliable and dependable and continues to be there for whatever challenge our bank has for them.”

InfoSight plans to continue to develop and implement proven managed security, IT compliance and vulnerability solutions nationwide and to partner with customers and resellers that are looking for a long standing trusted IT advisor.
