InfoSight Inc. Signs Marketing Agreement with Unified Physicians Management (UPM)

Providing Health Care Centers with HIPAA Compliance, Information Security Services, and IT Support

MIAMI, FL (March 2014) InfoSight Inc. – InfoSight Inc., provider of Managed Health Care IT Security, HIPAA Compliance and Vulnerability Management services for regulated industries, announced a new agreement with Unified Physicians Management (UPM). UPM is the management services organization to Florida’s largest Obstetrics and Gynecology group practice, Florida Woman Care and to Unified Women’s Health Care in Georgia and North Carolina. UPM offers comprehensive practice management to its clients, including technology solutions, electronic health records, human resource management, accounting, managed care contracting and management, group purchasing and data analytics.

The agreement offers information technology (IT) and IT security support and HIPAA Compliance services to UPM’s Care Centers throughout Florida, Georgia and North Carolina. Services include Network Support, Managed IT Security Services, HIPAA-HITECH Risk Assessments and GAP Analysis, among others.

InfoSight has served regulated industries nationwide minimizing risk exposure for more than 15 years, providing the highest levels of IT security assurance and regulatory compliance. InfoSight provides straightforward, highly-robust, affordable solutions. Offering a broad portfolio of IT security and HIPAA compliance solutions designed to solve information technology challenges unique to the health care industry, InfoSight identifies, measures, controls and monitors technology to avoid the risks that threaten the security and soundness of medical practices.

“We feel the value added services that will be offered to our Health Care Centers will complement our existing suite of services,” said Allan Boshell, Chief Operating Officer of UPM. “This comprehensive approach will reduce IT support costs, as well as strengthen the HIPAA compliance posture and IT security of Unified Physicians Management client physicians.”

“By proactively addressing patient privacy and information security from a technology perspective, medical practices can reduce their risk foot print,” said Tom Garcia, CEO of InfoSight. “By partnering with InfoSight for their IT and information security needs, UPM Care Center Practice Managers and health care providers can focus on core medical practice competencies, improving operational efficiencies and reducing overall IT and security costs.”

To learn more about special discount pricing on IT security support and HIPAA Compliance services [contact InfoSight](#), or find them in UPM’s most recent Group Purchasing Directory (GPD) booklet.
