

# InfoSight®

Bringing the Future into Focus®

## A FINANCIAL CLIENT SUCCESS STORY

Optimizing Managed Security and Advisory Services for a safe, monitored network.

InfoSight has been Banco do Brasil Americas primary Cybersecurity provider for 7+ years providing best practices and solutions to all their security needs.

### CHALLENGES

Banco do Brasil Americas was looking to improve all around security of current and future services deployed in their AWS space including IAM procedures of current and future AWS accounts.

- Needed to reduce the on-premise storage footprints of archived backups.
- Needed a multi-monitoring system to better utilize performance-based metrics.
- Needed a more detailed AWS activity log for select AWS resources.
- Needed to be able to log and audit services to help them find causes of service specific problems.

### SOLUTIONS

Banco do Brasil Americas is now able to monitor, log and audit logs for services like SNS Notifications sent via SMS to their customers. This helps them find root causes of services specific issues faster than ever before.

InfoSight:

- Provides 24x7x365 Threat Detection and Response Services including mitigation and remediation.
- Deployed an AWS Storage Gateway for the company's archived backups, which helped reduce the on-premise storage footprint size by 92%.
- Leveraged the EC2 infrastructure to successfully deploy a web tier and database tier on their AWS Environment reducing the management overhead to maintain the server. This also offered more availability of services to their customers.
- Reviewed current IAM Policies, Roles & Groups to properly report advisory recommendations on how to create, maintain and optimize the firms IAM procedures for current and future users & services.

We have been using InfoSight as an Advisory and Managed Services provider for 7+ years now and they have been great! Their employees have performed multiple risk assessments on our network and always provide us with informative feedback keeping our environment secure.

InfoSight has ensured our institution is always available to serve our customers. We highly recommend using InfoSight for any of your Data Center / Cloud endeavors.
