

Bringing the Future into Focus®

AN ELECTRIC CLIENT SUCCESS STORY

Optimizing Managed Security and Advisory Services for a safe, monitored network.

InfoSight has provided Prairie Land Electric with best practices and solutions for their security needs.

CHALLENGES

Prairie Land Electric Cooperative Inc.'s team wanted InfoSight to test and assess their current security posture by conducting cybersecurity and social engineering assessments.

Their main goals were to:

- Protect members assets and data against cyberattacks
- Protect physical assets from social engineering attacks
- Get testing to see the efficiency of the organization's security awareness training

SOLUTIONS

InfoSight provided recommendations to Prairie Land Electric Cooperative Inc. based on test and assessment outcomes. This helped them quickly begin to correct and mitigate critical issues.

InfoSight:

- Performed external and internal network vulnerability assessments and penetration tests
- Provided mitigation steps and measurements to reduce the risk of discovered network vulnerabilities
- Performed physical security review of critical sites and provided mitigation steps and measure to reduce the risk of discovered vulnerabilities
- Performed clean desktop assessments to test the efficiency of the organizations policies and security awareness training

ABOUT PRAIRIE LAND ELECTRIC COOPERATIVE

Prairie Land Electric Cooperative Inc. was founded in 1938 in Norton, Kansas. They serve approximately 24,000 customers in part of 18 Northern Kansas Counties and operate about 7,000 miles of line. Their mission is to make electric energy available to its members at the lowest possible cost, consistent with sound economy and good management.

InfoSight allowed us to increase our cybersecurity posture within our networks.
