

Bringing the Future into Focus®

## A MANUFACTURING CLIENT SUCCESS STORY

Optimizing Managed Security and Advisory Services for a safe, monitored network.

InfoSight is Quirch Food's primary Cybersecurity provider, providing best practices and solutions to all their security needs.

### CHALLENGES

Quirch Foods was looking to improve their security posture on their current and future environment.

Quirch Foods wanted to:

- Protect all company assets and data from cyberattacks
- Be provided with Network Vulnerability Management
- Test efficiency of their current policies and security awareness as it pertains to email phishing

### SOLUTIONS

Quirch Foods continuously uses InfoSight to perform tests on their network to ensure a safe and secure environment. InfoSight's experts provide solutions, strategies and reports based on what is found in these tests and assessments.

InfoSight:

- Semi-annually performs external, internal and WIFI network vulnerability assessments and penetration tests
- Provides mitigation steps and measures to reduce the risk of discovered network vulnerabilities
- Provides solutions and strategies for vulnerability management
- Performs social engineering email phishing tests against the employees to test the efficiency of Quirch Foods security awareness policies and training

Working with InfoSight is such a smooth process. They know what to do and how to do it and they always go above and beyond to make sure our networks are secure. We never have to check in on what InfoSight is doing because we trust them, that being said they also never leave us in the dark about anything. Their communication with us really stands out from previous providers. Their experts' communication and services really stand out and that's why we continue to work with InfoSight and have no plans on stopping!
