

Security as a Service (SECaaS)

Overview - The Challenge

In today's cybersecurity environment staffing for quality experts is a constant challenge due to sheer demand. Additionally, sourcing quality tools that are implemented to full feature capacity and keeping them that way requires a large and constant effort. And it's a 24x7x365 job too!

Security as a service (SECaaS) allows you to outsource these challenging tasks around the clock to ensure your organizations cybersecurity and incident response plan is as effective as possible against cyberattack and systems compromise.

How We Solve It

InfoSight's SECaaS offering simplifies your overall cybersecurity effort into an affordable subscription-based "pay as you go" model. It reduces the challenges associated with hiring and retaining cybersecurity experts and managing a 24x7 internal team saving your organization time and money!

Why InfoSight

- 24x7x365 US-Based SOC/NOC
- SOC 2 Certified
- Complete MSSP Services that include Monitoring, Real-Time Threat Analysis, Mitigation/Remediation, Alerting, Reporting and Device Management
- Flexible pricing models that can be 24x7, 8x5, or off-peak 7pm to 7am only coverage
- 22+ years Regulatory Compliance experience (GLBA, PCI, HIPAA, NERC, AWWA, etc.)
- Certified Experts (CISSP, CISA, CEH, OSCP, AWS, AWWA, etc.)
- Managed Services for On-premise Data center, Cloud and Hybrid environment

Key Service Features

- SOCaaS
- Managed MDR
- Managed EDR
- Managed XDR & SIEM
- VISO
- Reporting & Analytics
- DLP Solutions
- Access & Identity Management

& MORE!

Security as a Service (SECaaS)

Service Descriptions

 **SOCaaS** - Detects cyber threats quickly and provides containment, mitigation and remediation services to ensure a safe running environment 24x7x365. We offer a hosted SIEM in a layered security model where all assets can be viewed in a "single-pane of glass" by both your IT team and ours at the same time

 **Managed EDR** - Monitor, contain & remediate malware attacks on your endpoints before any real damage is done. We can significantly enhance attack visibility targeting endpoint devices 24x7x365 with our US-based SOC.

 **Managed XDR & SIEM** - Our USM delivers a highly extensible platform that leverages multiple direct integration into modular software components that are tightly integrated into the USM platform which extend, orchestrate, and automate functionality between the built-in security controls of USM and other third-party security and productivity tools provides essential security controls, capabilities, and features to deliver complete security visibility.

 **VISO** - We provide your organization with a Virtual Information Security Officer (vISO) who serves as an extension of your business and is responsible for making recommendations for the development, implementation and management of your organization's corporate security vision, strategy, and programs

 **DLP Solutions** - Our Our toolsets and processes ensure that sensitive data is not stolen, misused, or subject to unauthorized access. Our DLP solution classifies regulated, confidential and business critical data and identifies potential company policies as well as regulatory compliance such as GLBA, HIPAA, PCI-DSS, NERC or GDPR.

 **Access & Identity Management** - Our customized framework of policies and technologies ensure ensures that only the correct people in your organization can access the tools they need to do their jobs while providing online security increased productivity. The right IAM solution ensures, your organization has the highest standards of security, tracking, and administrative transparency during day-to-day operations.
